## DISPOSAL OF AIR CHECK CARS NEEDS YOUR HELP

TARA attended a meeting with the Scrap Metal Recyclers and discussed the issue that numerous cars taken in under the program have not gone to designated Scrap Metal facilities. Statistics show that a number of vehicles have not been delivered to the participating Scrap Metal recyclers. At the present, only the eleven (11) scrap metal facilities listed below are authorized to take the crushed vehicles. You can also link to [www.driveacleanmachine.org](http://www.driveacleanmachine.org) to check updates. There have been situations where the dismantlers have hired independent car crushers and the crusher has taken the vehicles to non compliant Steel Metal recyclers without the dismantler's knowledge. *Dismantlers need to make sure that these crushed cars are delivered to a participating Steel Metal facility.*
